Java Programming Homework | Chapter 1

For each question, write, compile, and test a Java class. Save each class in a separate .java file using the filename shown.

1. Movie Quote Information
Save as MovieQuoteInfo.java.

Use exactly four System.out.println() statements to display the following information, one item per line, in this order:

1) Your favorite movie quote
2) The title of the movie
3) The name of the character who said the quote
4) The year the movie was released

2. Table and Chairs
Save as TableAndChairs.java.

Display the following pattern using uppercase X characters and spaces. Match the spacing and line breaks. Start with the first row of the pattern.

```
X                       X
X                       X
X       XXXXXXXXXX      X
XXXXX  X         X  XXXXX
X   X  X         X  X   X
X   X  X         X  X   X
```

3. Triangle
Save as Triangle.java.

Display the following pattern using uppercase T characters and spaces. Match the indentation and line breaks. Start with the row containing a single T.

```
   T
  TTT
 TTTTT
TTTTTTT
```

TTTTTTTTT
TTTTTTTTTT
TTTTTTTTTTTT

4. Java Comments
Save as Comments.java.

Display the following statement on two lines:

Program comments are nonexecuting statements
you add to a file for documentation.

Include the same statement in your source code in each of these three comment styles:

1) Single-line comment (//)
2) Block comment (/* ... */)
3) Javadoc comment (/** ... */)

5. Burma Shave
Save as BurmaShave.java.

Burma Shave once advertised with a series of roadside signs, each displaying part of a rhyme. Find a classic Burma Shave rhyme on the web that has four lines of verse followed by Burma Shave on the fifth line. Display it on five separate lines. The final line must read exactly Burma Shave.
